Verdone	TOST-VE316

## TECHNICAL INFO

In order to avoid any problems connected with the nature of the glaze used to obtain the typical "craquelé" finish, Stek collection must be treated as follows:

1. Lay down the tiles (pre-installation)
2. Clean the tiles with a non-acid product and lay a uniform coat of sealer
3. Apply **only white cementitious grout**
4. Clean the tiles well with a non-acid product
5. Once the tiles are clean and dry lay a second coat of sealer

TILELab Grout and Cleaner and TILElab Grout and Sealer are products available from Home Depot

<sup>1</sup> Special order sizes and finishes available in most colours. Please consult with a sales representative for more information (availability dependent on order quantity).
